

Turning Strategy into Operational Reality

Transformation Architecture & Operating Model Design

THE PROBLEM

Most transformation programs fail not because the strategy is wrong — but because the operating model cannot execute it. Structure, processes, technology, governance and people are often not aligned to deliver the intended change.

WHAT I DO

As a Transformation Leader and Operating Model Architect, I design operating models and transformation structures that enable organizations to execute strategy and deliver complex change. My work focuses on the integration layer where most transformations struggle.

SELECTED IMPACT

- 30+ international transformation initiatives delivered
- Programs and initiatives with up to 150 people
- Operating model design and implementation across 20+ countries
- €20M+ cost improvements realized through structural transformation

TYPICAL ENGAGEMENTS

- Transformation Diagnostic
- Transformation Architecture
- Transformation Enablement

BACKGROUND

15+ years of transformation experience across consulting and industry, including Deloitte, Horváth, BearingPoint and Boehringer Ingelheim. Work across supply chain, procurement, operations and digital transformation.
